Abilities		Description												
Enhanced Warriors		If this unit is attached to a unit at the start of the battle, until the end of the battle, add 1 to the Strength characteristic of melee weapons equipped by Bodyguard models in that unit and add 1 to the Toughness characteristic of Bodyguard models in that unit.												
Leader		This model can be attached to the following units: ■ ACCURSED CULTISTS ■ CHOSEN ■ CULTIST MOB ■ LEGIONARIES												
Surgeon Acolyte		Once per turn, when an attack is allocated to a model in this unit, if this unit contains FABIUS BILE, you can change the Damage characteristic of that attack to 0.												
Chirurgeon		The first time this unit's FABIUS BILE model is destroyed, roll one D6: on a 2+, set it back up on the battlefield, as close as possible to where it was destroyed and not within Engagement Range of any enemy models, with its full wounds remaining. If that model was attached to a unit when it was destroyed, it must be set up attached to that unit.

Force Rules

Army Roster (Chaos - Chaos Space Marines)

Psychic

Some weapons and abilities can only be used by PSYKERS. Such weapons and abilities are tagged with the word 'Psychic'. If a Psychic weapon or ability causes any unit to suffer one or more wounds, each of those wounds is considered to have been inflicted by a Psychic Attack.

Selection Rules

Anti-:

Weapons with [ANTI-KEYWORD X+] in their profile are known as Anti weapons. Each time an attack is made with such a weapon against a target with the keyword after the word 'Anti-', an unmodified Wound roll of 'x+' scores a Critical Wound.

Dark Pacts:

If your Army Faction is HERETIC ASTARTES, each time a unit with this ability is selected to shoot or fight, it can make a Dark Pact. If it does, it must first take a Leadership test before any effects of the Dark Pact are resolved; if that test is failed, that unit suffers D3 mortal wounds. Then, select one of the following abilities for that unit's weapons to gain until the end of the phase:

- [LETHAL HITS]
- [SUSTAINED HITS 1]

Deadly Demise D3:

Some models have 'Deadly Demise x' listed in their abilities. When such a model is destroyed, roll one D6 before removing it from play (if such a model is a TRANSPORT, roll before any embarked models disembark). On a 6, each unit within 6" of that model suffers a number of mortal wounds denoted by 'x' (if this is a random number, roll separately for each unit within 6").

Devastating Wounds:

Weapons with [DEVASTATING WOUNDS] in their profile are known as Devastating Wounds weapons. Each time an attack is made with such a weapon, if that attack scores a Critical Wound, no saving throw of any kind can be made against that attack (including invulnerable saving throws). Such attacks are only allocated to models after all other attacks made by the attacking unit have been allocated and resolved. After that attack is allocated and after any modifiers are applied, it inflicts a number of mortal wounds on the target equal to the Damage characteristic of that attack, instead of inflicting damage normally.

Extra Attacks:

Weapons with [EXTRA ATTACKS] in their profile are known as Extra Attacks weapons. Each time the bearer of one or more Extra Attacks weapons fights, it makes attacks with each of the Extra Attacks melee weapons it is equipped with and it makes attacks with one of the melee weapons it is equipped with that does not have the [EXTRA ATTACKS] ability (if any). The number of attacks made with an Extra Attacks weapon cannot be modified by other rules, unless that weapon's name is explicitly specified in that rule.

Feel No Pain 5+:

Some models have 'Feel No Pain x+' listed in their abilities. Each time a model with this ability suffers damage and so would lose a wound (including wounds lost due to mortal wounds), roll one D6: if the result is greater than or equal to the number denoted by 'x': that wound is ignored and is not lost. If a model has more than one Feel No Pain ability, you can only use one of those abilities each time that model suffers damage and so would lose a wound.

Fights First:

Units with this ability that are eligible to fight do so in the Fights First step, provided every model in the unit has this ability.

Hazardous:

Weapons with [HAZARDOUS] in their profile are known as Hazardous weapons. Each time a unit is selected to shoot or fight, after that unit has resolved all of its attacks, for each Hazardous weapon that targets were selected for when resolving those attacks, that unit must take one Hazardous test. To do so, roll one D6: on a 1, that test is failed. For each failed test you must resolve the following sequence (resolve each failed test one at a time):

- If possible, select one model in that unit that has lost one or more wounds and is equipped with one or more Hazardous weapons.
- Otherwise, if possible, select one model in that unit (excluding CHARACTER models) equipped with one or more Hazardous weapons.
- Otherwise, select one CHARACTER model in that unit equipped with one or more Hazardous weapons.

If a model was selected, that unit suffers 3 mortal wounds and when allocating those mortal wounds, they must be allocated to the selected model.

If a unit from a player's army is selected as the target of the Fire Overwatch Stratagem in their opponent's Charge phase, any mortal wounds inflicted by Hazardous tests are allocated after the charging unit has ended its Charge move.

Leader:

While a Bodyguard unit contains a Leader, it is known as an Attached unit and, with the exception of rules that are triggered when units are destroyed (pg 12), it is treated as a single unit for all rules purposes. Each time an attack targets an Attached unit, until the attacking unit has resolved all of its attacks, you must use the Toughness characteristic of the Bodyguard models in that unit, even if a Leader in that unit has a different Toughness characteristic. Each time an attack successfully wounds an Attached unit, that attack cannot be allocated to a Character model in that unit, even if that Character model has lost one or more wounds or has already had attacks allocated to it this phase. As soon as the last Bodyguard model in an Attached unit has been destroyed, any attacks made against that unit that have yet to be allocated can then be allocated to Character models in that unit.

Each time the last model in a Bodyguard unit is destroyed, each CHARACTER unit that is part of that Attached unit becomes a separate unit, with its original Starting Strength. If this happens as the result of an attack, they become separate units after the attacking unit has resolved all of its attacks.

Each time the last model in a CHARACTER unit that is attached to a Bodyguard unit is destroyed and there is not another CHARACTER unit attached, that Attached unit's Bodyguard unit becomes a separate unit, with its original Starting Strength. If this happens as the result of an attack, they become separate units after the attacking unit has resolved all of its attacks.

Each time a unit that is part of an Attached unit is destroyed, it does not have the keywords of any other units that make up that Attached unit (unless it has those keywords on its own datasheet) for the purposes of any rules that would be triggered when that unit is destroyed.

Pistol:

Weapons with [PISTOL] in their profile are known as Pistols. If a unit contains any models equipped with Pistols, that unit is eligible to shoot in its controlling player's Shooting phase even while it is within Engagement Range of one or more enemy units. When such a unit is selected to shoot, it can only resolve attacks using its Pistols and can only target one of the enemy units it is within Engagement Range of. In such circumstances, a Pistol can target an enemy unit even if other friendly units are within Engagement Range of the same enemy unit. If a model is equipped with one or more Pistols, unless it is a MONSTER or VEHICLE model, it can either shoot with its Pistols or with all of its other ranged weapons. Declare whether such a model will shoot with its Pistols or its other ranged weapons before selecting targets.

Precision:

Weapons with [PRECISION] in their profile are known as Precision weapons. Each time an attack made with such a weapon successfully wounds an Attached unit, if a Character model in that unit is visible to the attacking model, the attacking model's player can choose to have that attack allocated to that Character model instead of following the normal attack sequence.

Rapid Fire:

Weapons with [RAPID FIRE X] in their profile are known as Rapid Fire weapons. Each time such a weapon targets a unit within half that weapon's range, the Attacks characteristic of that weapon is increased by the amount denoted by 'x'.

Torrent:

Weapons with [TORRENT] in their profile are known as Torrent weapons. Each time an attack is made with such a weapon, that attack automatically hits the target.

Twin-linked:

Weapons with [TWIN-LINKED] in their profile are known as Twin-linked weapons. Each time an attack is made with such a weapon, you can re-roll that attack's Wound roll.
